
Helping clients
transform into an **AI
Enhanced** business

Neural Vibe

ISO Certification Services

Created by Neural Vibe

Helping our clients transform into **AI Enhanced** businesses

Who are Neural Vibe ?

Neural Vibe is a rapidly expanding consultancy specializing in helping clients transform into an AI enhanced business, with a strong focus on Strategy, Risk, Planning, Implementation, Regulatory Affairs and ISO Standards Certification.

Although we are a new company, our senior team has many years of combined experience in helping clients manage transformative change in their businesses, industries, and customer expectations.

At Neural Vibe, we help our clients identify AI technologies that offer them the greatest advantages, helping to seamlessly integrate them into their operations, services, and products. Our approach ensures strict compliance with regulatory requirements, aligning with industry best practices and international standards.

Why choose **Neural Vibe** as your ISO Compliance partner ?

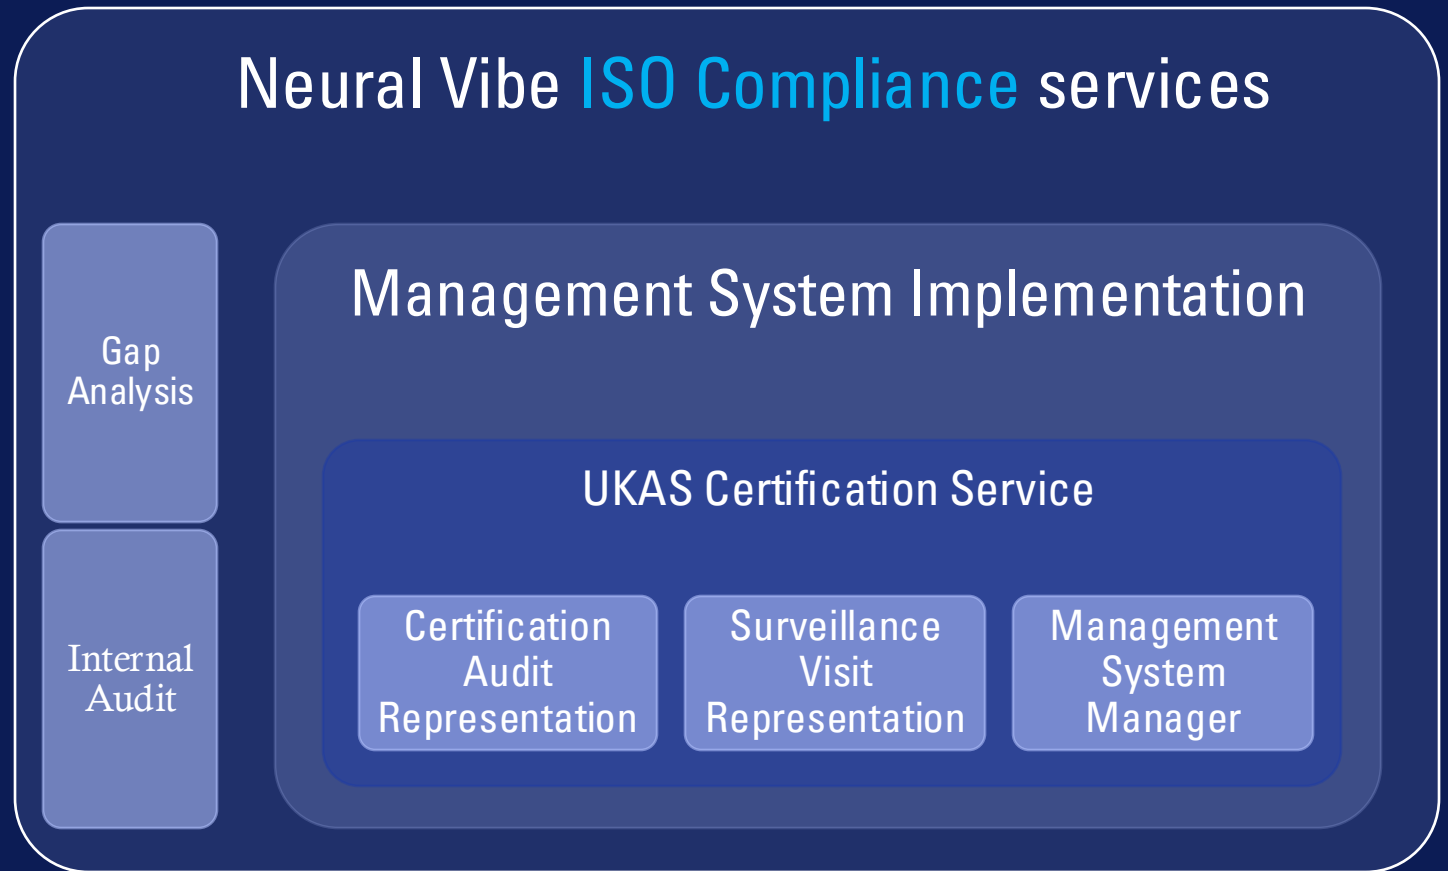

Partnering with Neural Vibe for your ISO compliance means leveraging our extensive expertise and client-centric approach to achieve and maintain the highest standards of quality, security, and compliance.

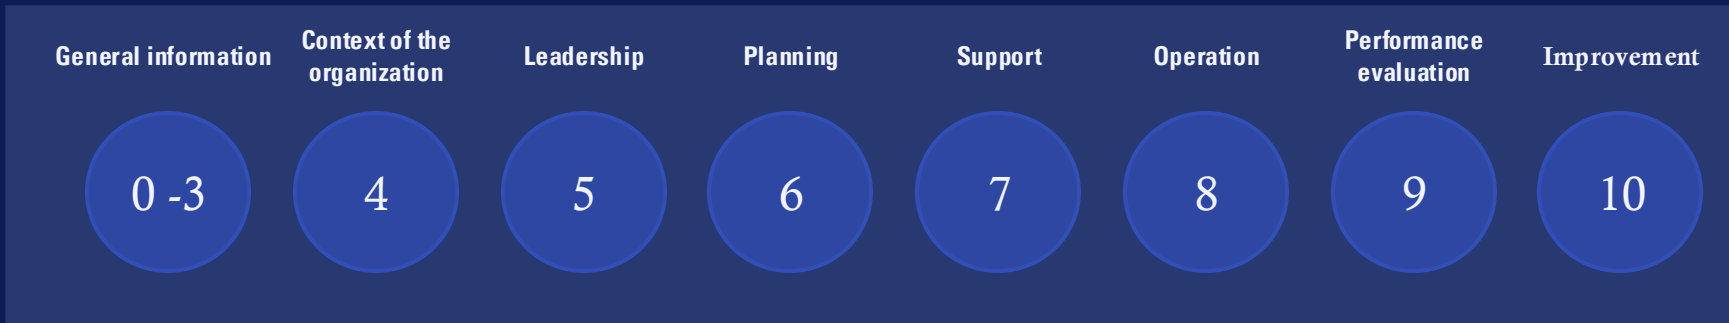

Our ISO Certification services cover the implementation and integration of key management systems, as well as their certification and ongoing compliance. Standards include:

- ISO 42001: Artificial Intelligence Management
- ISO 27001: Information Security Management
- ISO 27017: Cloud Security (27001 extension, not independently certifiable)
- ISO 27701: Privacy Management (27001 extension, not independently certifiable)
- ISO 13485: Medical Devices Quality Management
- ISO 9001: Quality Management Systems

Let Neural Vibe to deliver your **ISO Compliance**

ISO compliance services that seamlessly integrate into your business

0 -3 General information Introduction, scope, normative references, terms and definitions	7 Support Establish, implement and maintain the ISMS based on: Competence, Awareness, Communication, Documented Information and Records (that must be kept)
4 Context of the organization Create the ISMS Scope that sets the boundaries of your system and the applicability of the controls	8 Operation Risk treatment plan and risk assessment report to mitigate the risks that might arise as a result of your company's scoped operations
5 Leadership Top management to document a Policy Statement with employees and clients	9 Performance evaluation Establish a procedure for monitoring and measurement of records. Documented process for the performance of internal audits and management reviews
6 Planning Establish, measure and monitor objectives based on risks and opportunities	10 Improvement Improvement follows up on the evaluations covered in Clause 9

Mandatory Clauses

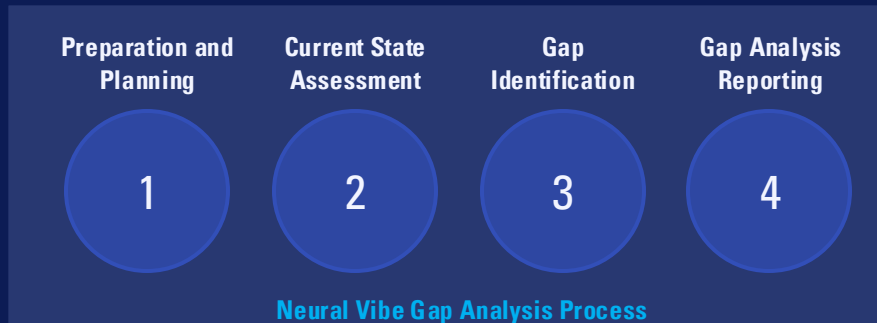

Many ISO management system standards follow the same clause structure, making implementation consistent across systems and easing the integration of the systems. This is true of **ISO 27001, 42001, and 9001**, which Neural Vibe can implement and integrate for you.

Management Systems expertise you can rely on

Some management systems have a slightly different structure, such as [ISO 27701](#) and [ISO 13485](#). However, don't worry, as Neural Vibe can implement and integrate these systems seamlessly for you too.

Management Systems expertise you can rely on

- 1 Preparation and Planning**

We determine the scope of the gap analysis and review the specific clauses and requirements of the relevant ISO standard(s). Gather all relevant documentation and assemble a knowledgeable team, utilizing our detailed gap analysis templates to ensure comprehensive coverage.

- 2 Current State Assessment**

We help document current practices, processes, and controls within the organization. Conduct interviews with key personnel to understand their effectiveness and identify any potential areas of concern.

- 3 Gap Identification**

NeuralVibe compare the current state against the requirements of the ISO standard(s) using the gap analysis templates and of course our experience. We identify areas of non-compliance and potential risks to the organization.

- 4 Gap Analysis Reporting**

We document our findings using the gap analysis report templates, highlighting non-compliance areas. We include a detailed action plan with specific steps, responsible parties, and timelines to address the identified gaps.

- 5 Implementation and Monitoring**

NeuralVibe will implement recommended changes and regularly monitor progress against their adoption. We conduct periodic reviews to ensure the implemented changes are effective and sustainable.

- 6 Pre-Certification Internal Audit**

We perform an internal audit to verify the effectiveness of implemented changes. Address any remaining issues and ensure readiness for the stage 1 & 2 certification audit.

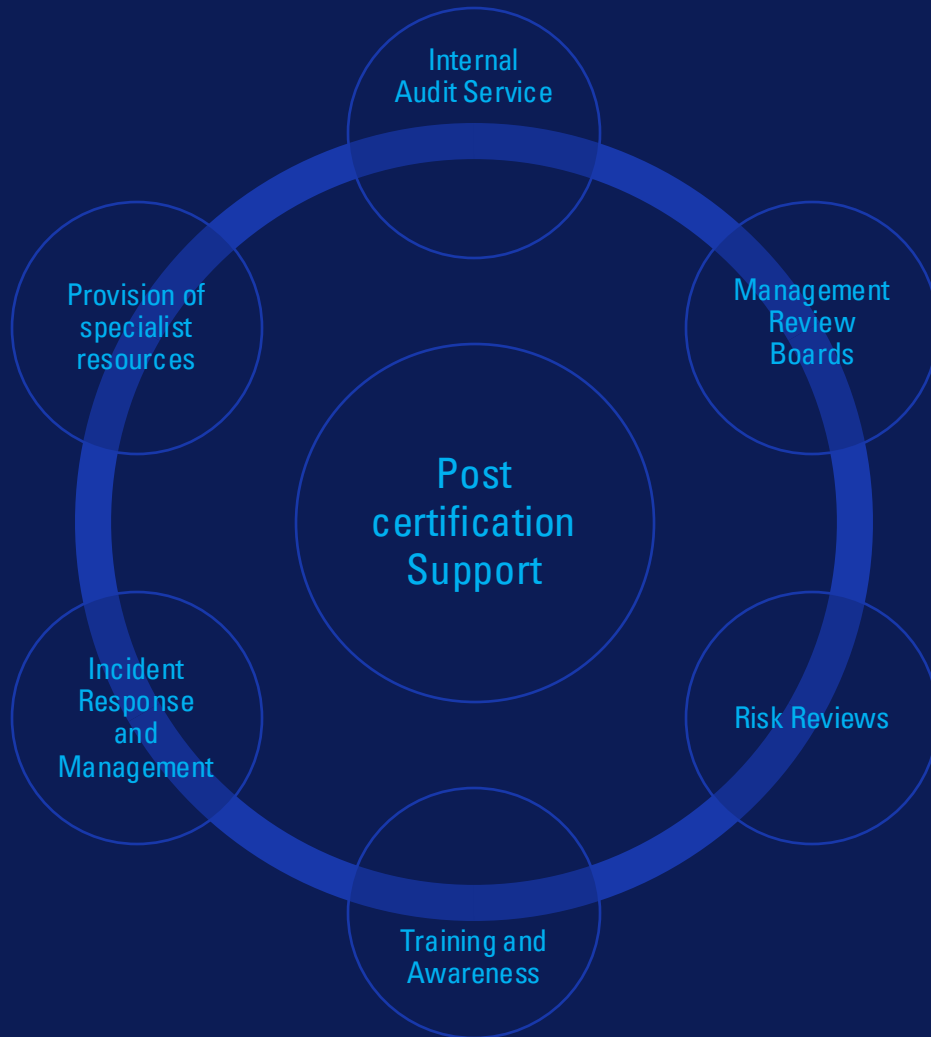

- 7 Engage Certification Body**

We support your selection of an appropriate certification body accredited to certify against the relevant ISO standard(s). We ensure the chosen body aligns with your specific needs and industry requirements. Our network has access to lots of options for you to choose from.

- 8 Undergo Certification Audits**

We prepare the organization for certification audits and manage the process with the certification body. Neural Vibe can represent you during the audits to achieve successful certification.

Managing your Implementation and Certification

The implementation journey doesn't end with certification, and neither does **our support**. Neural Vibe offers comprehensive post-certification services to ensure your management systems continue to operate effectively and deliver ongoing value to your organization. Our services include:

- **Internal Audit Service:** Regular internal audits to ensure compliance with standards and identify areas for improvement.
- **Management Review Boards:** Facilitation of management reviews to evaluate system performance and strategic alignment.
- **Risk Reviews:** Continuous risk assessments to identify new threats and ensure effective mitigation strategies.
- **Training and Awareness:** Ongoing training programs to keep your team informed about best practices and regulatory changes.
- **Incident Response and Management:** Support in managing and responding to incidents to minimize impact and improve resilience.
- **Provision of Specialist Resources:** Access to expert resources to assist with specific challenges and enhance your management system's effectiveness.

Our support continues beyond certification
